

SZ-URBAN

The SZ-Urban is the latest addition to the open face range. It is based on the SZ/f, an open face helmet that is acknowledged to be the benchmark in its segment. The same fit and comfort, complete with removable ear cups, is granted.

The SZ-Urban is perfect for urban (motor-) scooter use offering an excellent entry level, open face Arai helmet that is sturdy enough to withstand the rigors of daily city use.

Smart ventilation

The two top ducts are positioned lower and more on the side of the outer shell so they are much less prone to damage in an under seat luggage compartment of a scooter.

Fibre glass outer shell

The fiberglass outer shell is not only extremely strong, but also lightweight. The ergonomically shaped shell offers a more enveloping fit toward the bottom opening, allowing improved streamlining and smarter appearance.

Penetration resistant

The penetration test is performed with a 3 kg cone steel striker that hits the fiberglass outer shell after a free fall from 3 meters height. The SZ-Urban passes this important test, although it is not required by the European helmet standard.

Removable ear cups

For a custom fit, the washable ear cups with their shock absorbing liner can be changed for thicker or thinner ones. There is much room around the ear area for better comfort and plenty of space for a communication device.

Visor

Beautiful, aerodynamically shaped and optically correct visor. Preformed with a 3D shape for better vision, less distortion and UV ray protection. Available in tinted versions. The shield can be changed in seconds without the need for tools.

LRS

Thanks to the LRS (Lever Release System) the shield can be changed in seconds without the need for tools.

Multiple-density EPS foam liner

Unique single piece, multiple-density EPS foam liner, an Arai technology that combines three to five densities in various areas as a single component, rather than an assembly of separate pieces fitted together.

Reinforced bottom

The outer shell is reinforced at the bottom for even more strength and stiffness with the Arai Hyper Ridge.
